

How to install Blog theme

1. Install Wordpress from: <https://wordpress.org/latest.zip>
2. Install Divi Theme
3. Install and activate Divi Builder plugin
4. Install and activate Blog theme

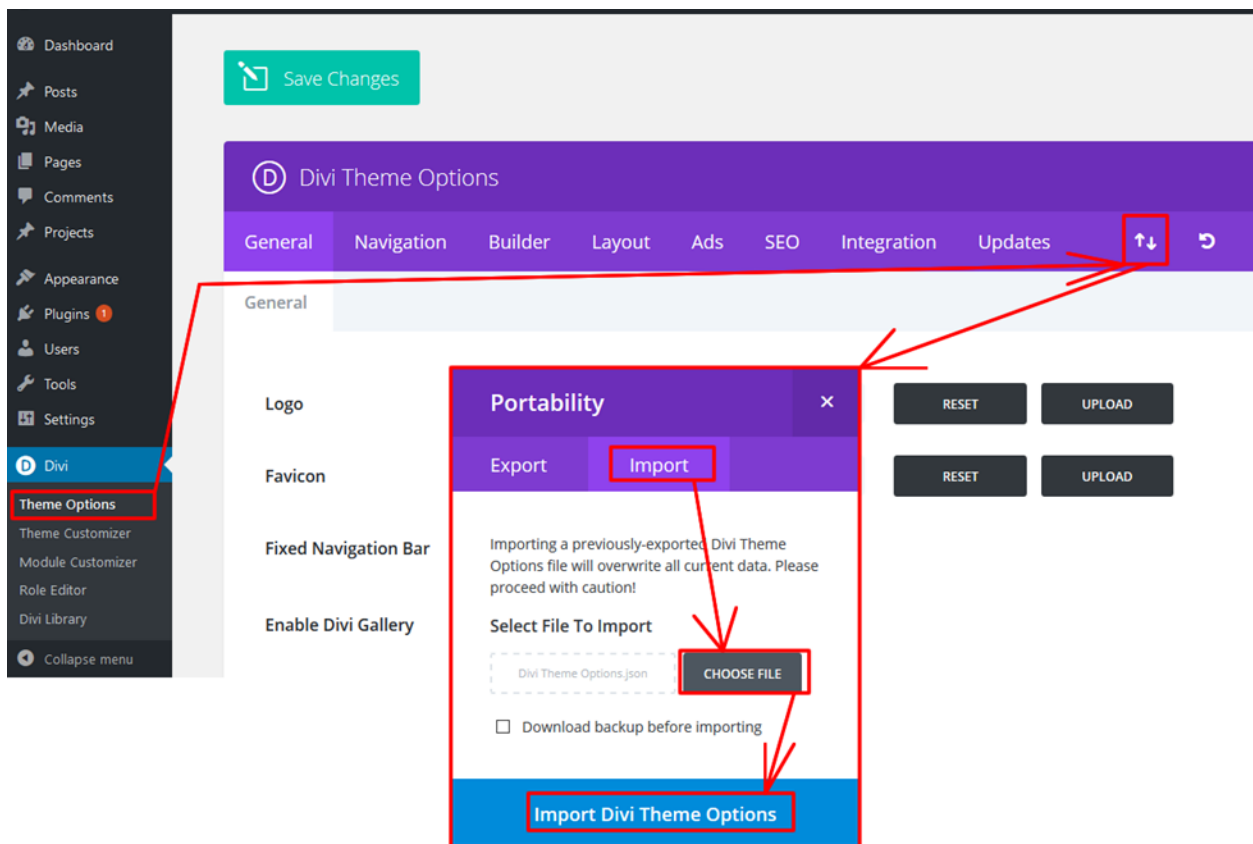

5. Import Wordpress posts etc from Tools->Import->Wordpress-> Install now, then "Run importer".
Select the .xml file and press "Upload file and import" button.

6. Import Divi Theme Options

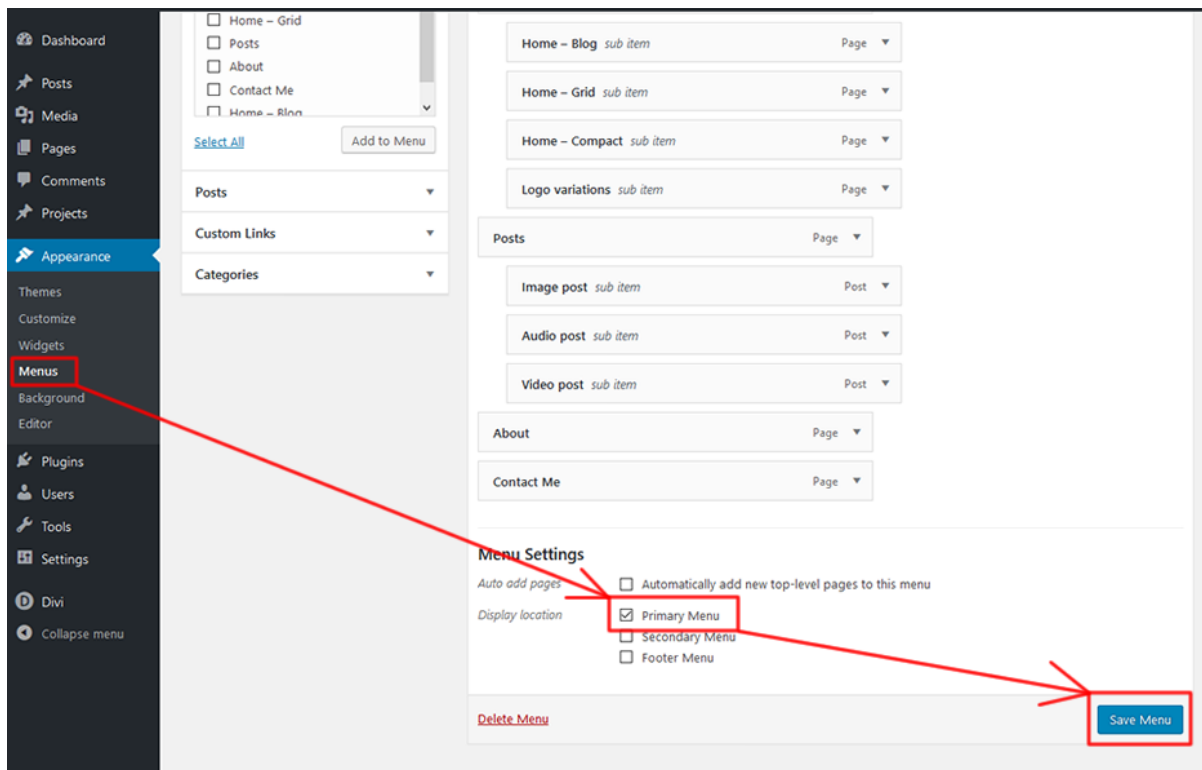

7. Import Divi Customizer Settings

The image shows the Divi Theme Customizer interface. On the left, the 'Theme Customizer' option is highlighted in the sidebar. The main panel shows various settings categories like 'General Settings', 'Header & Navigation', and 'Footer'. A red box highlights the 'Import & Export' icon in the top right corner. To the right, a 'Portability' dialog box is open, showing the 'Import' tab. A red box highlights the 'Import' button. Below it, a warning message states: 'Importing a previously-exported Divi Customizer Settings file will overwrite all current data. Please proceed with caution!'. Under 'Select File To Import', there is a 'No File Selected' placeholder and a 'CHOOSE FILE' button. A checkbox for 'Download backup before importing' is also visible. At the bottom, a large blue button labeled 'Import Divi Customizer Settings' is highlighted.

8. Go to Divi->Divi Library and import Divi Builder Layouts

The image shows the Divi Library interface. The 'Divi Library' option is highlighted in the sidebar. The main panel shows 'Layouts' with options for 'Manage Categories', 'Import & Export', and 'Add New'. A red box highlights the 'Import & Export' button. To the right, a 'Portability' dialog box is open, showing the 'Import' tab. A red box highlights the 'Import' button. Below it, a warning message states: 'Select a previously-exported Divi Builder Layouts file to begin importing items. Large collections of image-heavy exports may take several minutes to upload.'. Under 'Select File To Import', there is a 'Divi Builder Layouts.json' placeholder and a 'CHOOSE FILE' button. At the bottom, a large blue button labeled 'Import Divi Builder Layouts' is highlighted.

9. Go to Appearance->Menu and select "Primary menu" option

10. Go to Settings->Reading and select the Home page as static front page
